The year group you use each resource at is only a guideline and you may choose to use them at other year groups.

These activity sheets are designed to complement work in other subject areas, that you may also set as homework. The emphasis in these activity sheets is on Mathematics and English skills. These resources are designed to assist pupils to learn and reinforce the basic skills in both areas, and provide an 'easy to use', but worthwhile resource for you, the teacher.

Within sets at each level, all Mathematics objectives as stated in the

MATHEMATICS in the New Zealand Curriculum

have been covered. (Some objectives briefly, as some are difficult as homework activities).

I wish you well with your teaching.
